Modern Physics in Chemistry

Volume 2
edited by E. Fluck and V.I. Goldanskii
January 1980, xiv + 638pp., £37.00 (UK only) / $85.50, 0.12.261202.7

The techniques described in this book apply to such fields as X-ray photoelectron spectroscopy, neutron diffraction, secondary ionmass spectrometry, Mössbauer spectrometry and nuclear magnetic resonance spectroscopy. The volume aims to emphasize the contributions that the techniques described have made to the solution of chemical, physico-chemical and biological problems, rather than to detail methodology.

Molecular Association

Including Molecular Complexes — Volume 2
edited by R. Foster
1979, xviii + 490pp., £42.00 (UK only) / $98.00, 0.12.262702.4

Contents — *Noboru Mataga and Michael Ottolenghi*: Photophysical aspects of exciplexes. *J.M. Pearson, S.R. Turner and A. Ledwith*: The nature and applications of charge-transfer phenomena in polymers and related systems. *R.J. Laub and C.A. Wellington*: Study of complexation phenomena by gas-liquid chromatography. *J. Yarwood and R. Arndt*: The study of intermolecular interactions in the liquid phase using infrared Raman band shapes and intensities. *Milton Tamres and Robert L. Strong*: Contact charge-transfer spectra. **APL 0038**

An Introduction to Spectroscopy for Biochemists

edited by S.L. Brown
July 1980, xvi + 404pp., £16.60 (UK only) / $38.50, 0.12.137080.1

This book aims to provide an understanding of the established and potential value of spectroscopy in solving problems of biological and medical interest. The principles of each technique discussed are presented in a straightforward and precise, yet largely non-mathematical style. Emphasis has been placed on a wide survey of the application and scope of the various branches of spectroscopy.

Modern Aspects of Microwave Spectroscopy

edited by G.W. Chantry
1979, xiv + 514pp., £38.80 (UK only) / $89.50, 0.12.168150.5

This book serves a dual purpose. First, in bringing together experts from different branches of microwave spectroscopy, it should go a long way towards reducing the isolation in which recent research has been conducted and reported. To this end a comprehensive bibliography has been included at the end of each chapter. Secondly, each topic receives extensive critical discussion, which forms an up-to-date commentary on the progress in that area. APL 0108
